

# RESATER

## Health Network and Telemedicine in Rural Areas

### RESATER

The general purpose of the RESATER European network is to contribute to foster the development of the rural areas, **maintaining and further developing an adapted, innovative and evolutionary health and social-health care offer through a wider uptake of e-health, telemedicine and tele-care services**. To this end, the RESATER Network will operate through federated local networks, in order to guarantee an equitable access of the citizens and bring a qualified answer to the needs of patients.

Other objectives of the Network are:

- To develop an understanding of the e- Health, Telemedicine and tele-care situation in Europe
- To look for a positive progress on the telemedicine and e-Health services
- To stimulate efficient and innovative working methods in the field of e-Health and Telemedicine, and exchanging and sharing models of practice
- Stimulate an efficient use of the available means in e-Health, Telemedicine and Tele-care
- To develop new organizational relationships among healthcare professionals, patients, suppliers of service, local and regional authorities.
- To promote relationships and create synergies with other organizations sharing the same aims and views of health and social health care
- Increase of the number of local health networks and the number of participating organizations in the network.
- To foster the participation of the members of the network in European projects, initiatives, public consultations, platforms, associations, working groups to progress beyond the achievements of the RESATER project
- To leverage research, development of technologies and innovation in the health and social-health domain at a European and National level
- To search for complementarities with urban experts networks
- To achieve a higher satisfaction of patients and citizens with the care offer
- To promote a medical adapted response time and a reduction of the waiting time/lists of patients to access health care benefits
- To allow for a best appropriation of ICTs tools and technologies by the locals and the professionals
- To create new jobs, directly or indirectly
